Auction for Autographed Editions of the Centenary Blue Journal

This year marks the 100th anniversary of the Blue Journal, first published in 1917!

To celebrate this milestone, The American Thoracic Society is auctioning 30 limited edition copies of the May 2017 Centenary issue of **The American Journal of Respiratory and Critical Care Medicine** that have been autographed by lead authors of the special centenary editorials.

The silent auction will run until June 30, 2017. The minimum bid is \$300, with all proceeds going to the ATS Foundation to support young researchers.

Go online and bid for one of these valuable copies. All bidders will receive periodic updates about the current highest offer. In July the winners will be notified and copies of the Centenary issue will be mailed to them.

Own a piece of history and support early career researchers at the same time!
