

WORLD AIDS DAY

DECEMBER 1

Around the world in 2016:

- 1 million people died from AIDS
- 36.7 million were living with HIV/AIDS
- 1.8 million had become newly infected

Africa has 11 percent of the world population, but 60 percent of those living with HIV/AIDS and nearly two-thirds of the new infections.

AFRICA

HIV → TB

HIV infection is the strongest risk factor for progressing from latent to active TB.

The Forum of International Respiratory Societies is calling on governments, health advocates and NGOs to strengthen their response to HIV/AIDS.
