Hard at Work– our “conversations

MECOR Turkey 2012

Hard at Work-- our “conversations”

MECOR Turkey 2012

Hard at Work -- Small Groups

MECOR Turkey 2012

Hard at Work – Small Groups

MECOR Turkey 2012

Hard at Work – “Quizzes?????”

MECOR Turkey 2012

What is the Question– Level 1

- Mother's working status as a predisposing factor for recurrent wheezing
- Effect of socio-economic status on asthma control after emergency room education in Turkey
- The impact of socio-economic status on influenza vaccination coverage among COPD patients; a multi-center, cross-sectional study
- Severity of primary graft dysfunction and time to chronic rejection after lung transplantation
- A real life perspective of non-invasive ventilation in acute respiratory failure patients with chronic obstructive pulmonary disease in ward.

MECOR Turkey 2012

What is the Question- Level 2

- Knowledge and attitude of family members and asthma control in older patients
- Depression score in sarcoidosis patients
- Influenza season and length of stay in hospital due to acquired pneumonia
- Can baseline CAT score predict exacerbations in COPD patients?
- Comparison of COPD prevalence between metropolitan Tehran and other parts of Tehran
- Evaluation of time of smoking in movies during last 10 years in Iran

MECOR Turkey 2012

What is the Question– Level 2

- Level of Vitamin D in asthma patients, lung function and asthma control
- Copeptin: a novel biomarker for discriminating parapneumonic effusions from other exudative effusions
- Effects of pathological changes on FEV1 in operated pneumothorax patients
- Does adherence to nasal steroids for allergic rhinitis differ between children with vs without asthma?
- Predictor factors of time of clearance of sputum smear in MDR TB patients?

MECOR Turkey 2012

What is the Question– Level 3/4

- What is the association between district lifestyle quality and adverse treatment outcomes in tuberculosis patients in Istanbul
- Closed loop ventilation strategy to increase ventilator free days in the ICU: a randomized controlled trial
- Does low molecular weight heparin with thrombolytic treatment increase major herroahage compared with UFH+thrombolytic in patients hospitalized with acute massive pulmonary embolism
- Can a portable screening device diagnose sleep disorderd breathing in children with Downs syndrome
- A scoring system to discriminate atopic and non-atopic patients with asthma and/or rhinitis

MECOR Turkey 2012

What is the Question– Level 3/4

- Does one year change in quality of life predict mortality in patients with COPD?: A prospective cohort study
- Gender differences in the Fagerstrom Nicotine Dependence Test in a Turkish population
- Comparison of osteopontin and soluble mesothelin related peptid levels in mesothelioma patients, pleural plaque patients and healthy subjects exposed to environmental asbestos
- Does exposure duration, seniority at work, and numb of work places have an affect on progression of disease among former denim sandblasters
- Does one year change in quality of life predict mortality in patients with COPD?: A prospective cohort study

MECOR Turkey 2012

What is the Question– The Global Course

- The prevalence of respiratory symptoms and lung function patterns among motor cyclists (Okada riders) in Sagamu, Nigeria
- Effect of environmental asbestos exposure on pulmonary function in Denizli, Turkey
- Quantitative reference values for microcirculation among healthy volunteers and individuals with cardiovascular risk factors
- Risk factors for default in TB treatment in Buenos Aires, Argentina
- Association between potentially inadequate medication consumption and health status in older adults
- Pulmonary arteriovenous malformations and embolic complications in patients with Hereditary Hemorrhagic Telangiectasia

MECOR Turkey 2012

What is the Question– The Global Course

- Once vaccinated, always vaccinated! Non-adherence and barriers to seasonal flu vaccination in the elderly
- Asthma specific health-related quality of life in children in Nairobi, Kenya
- The use of community health workers in TB treatment adherence
- Environmental risk factors for current or severe asthma in 13-14 year old African children participating in ISAAC 111

Acknowledgements

The ATS MECOR Program is developed and implemented by the American Thoracic Society (ATS)

MECOR Turkey 2012 is supported financially and in kind by:

- American Thoracic Society
- Turkish Thoracic Society

Support for the MECOR Global Course was provided by GSK, the American Thoracic Society, and the Turkish Thoracic Society

The American Thoracic Society acknowledges and thanks Drs. Arzu Yorgancıoğlu and Oya İtil and their colleagues who administered and organized MECOR Turkey 2012

Our sincere thanks to all who share the vision and support of the
ATS MECOR Program

MECOR

Gelecek yıl görüşmek üzere!

“Improving global lung health through development of local, country and regional lung disease research capacity”
