Disclosure

• No relevant conflicts of interest
• Opinions and recommendations represent expert panel interpretation of CMS published guidelines
• One suggested shared decision making tool developed in part by a member of this panel
Agenda

1) Screening benefit
2) Coding and billing for the service
3) Shared decision making visit
4) Remaining uncertainties
6) Q&A
**Lung Cancer Screening Benefit**
National Coverage Determination (NCD) 210.14

- LDCT for lung cancer screening
- Annual screening exam (CT)
- Shared decision making and counseling visit
- Waived co-pay(s) & deductible(s)
- Effective (retroactive to) February 5, 2015
Lung Cancer Screening Eligibility

• Beneficiaries aged 55 – 77 years
• 30 pack year smoking history
• Current or former smoker < 15 years ago
• No signs or symptoms of lung cancer
• Written order in chart meeting requirements
Screening Benefit - Documentation

- Written order in medical chart includes:
  - Beneficiary DOB
  - Actual pack-year (number)
  - Current smoking status
  - Time since quitting (if Former)
  - Absence of symptoms affirmed
  - Ordering provider NPI
## Billing Codes

<table>
<thead>
<tr>
<th>HCPCS</th>
<th>Long Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>G0296</td>
<td>Counseling visit to discuss need for lung cancer screening (LDCT) using low dose CT scan (service is for eligibility determination and shared decision making)</td>
</tr>
<tr>
<td>G0297</td>
<td>Low dose CT scan (LDCT) for lung cancer screening</td>
</tr>
</tbody>
</table>
ICD-9-CM & ICD-10-CM

• Note: Medicare will deny G0296 and G0297 for claims that do not contain:

<table>
<thead>
<tr>
<th>Date of Service (DOS)</th>
<th>ICD-CM Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ICD-9-CM Claims DOS 02/05/2015 to 09/30/2015</td>
<td>V15.82</td>
<td>History of tobacco use</td>
</tr>
<tr>
<td>ICD-10-CM Claims DOS on or after 10-1-2015</td>

Medicare Official Instructions

CR9246, consists of two transmittals:

1. Transmittal R3374CP, which updates the “Medicare Claims Processing Manual;" and
2. Transmittal R185NCD, which updates the “Medicare NCD Manual.”
Billing Guidance

• No patient co-pay(s) or deductible(s)- waived
• No telephone visits; must be face-to-face
• Cannot be billed with E&M without other indications or separate rationale
  – Use modifier -25 for separately identifiable E/M
• Ideally, claim submissions held since February 5, 2015
• Contractors shall **not search** for claims for lung cancer screening counseling and shared decision making visits or claims for lung cancer screening with low dose computed tomography, with dates of service on or after February 5, 2015, but contractors **may adjust claims that are brought to their attention.**
NOTE: For outpatient hospital settings, as in any other setting, services covered under this NCD must be ordered and performed by eligible Medicare providers for these services that meet the eligibility and coverage requirements of this NCD. See Pub.100-03, Medicare NCD Manual, Chapter 1, Section 210.14, for complete coverage requirements.
Claim Adjustments and Remittance – Reasons For Denial/Rejection

**G0296 counseling**
- Wrong type of provider
- Same date with another visit
- Wrong age
- Wrong diagnosis code

**G0297 LDCT**
- Wrong type of provider
- Wrong age
- Wrong diagnosis code
- Too soon (annual, full 11 months must elapse)
Shared Decision Making & Counseling Visit for Lung Cancer Screening

- Must occur before initial LDCT scan is ordered and performed
- Face-to-face encounter
- Provided by a Licensed Independent Practitioner (LIP) who can write an order for the low dose CT scan i.e. MD, ARNP, PA-C, CNS
- Written orders for subsequent annual LDCT screens may be furnished during appropriate LIP visit
Essential Elements of a Shared Decision Making Visit for Lung Cancer Screening

• Determination of beneficiary eligibility

• Discussion about:
  – Benefits and harms of screening
  – Follow-up diagnostic testing
  – Over-diagnosis
  – False positive rate
  – Total radiation exposure

• Counseling about:
  – Importance of cigarette smoking abstinence
  – Annual adherence; lung cancer screening is not a one time scan
  – Impact of comorbidities and ability or willingness to undergo diagnosis and treatment if something concerning is found

• Decision aids utilized to promote decision support
Defining Shared Decision Making

- Identifies the patient as expert in their interests, values and goals for life and healthcare
- Identifies the healthcare provider as the expert of clinical information
- Addresses patient’s rights, responsibilities, and preferences
- Provides mutuality in information exchange
- Patient centered, promotes informed choice and facilitates decision making
Informed Choice in the Shared Decision Making Encounter

• Interaction in which patients are neither deceived nor coerced

• Unbiased, high quality, evidence based, screening information is provided

• Information provided enables patient to come to an autonomous decision which reflects their personal preferences
Benefit of Decision Aids and Risk Assessment Tools

• Decision support in the face-to-face shared decision making visit
• Encourages collaboration between patient and healthcare provider
• Provides patient opportunity to consider their options and preferences
• Facilitates decision deliberation about pros and cons outside of the visit

Unresolved Questions

• How many times can the counseling SDM G0296 code be billed, prior to the first screening?
• How many providers can bill the counseling SDM G0296 code per beneficiary, per time frame?
• In what setting must SDM occur?
Sample EHR Bundle (SmartSet)

LUNG CANCER SCREENING

Guidelines

Note to ordering clinician: Centers for Medicare and Medicaid Services requires specific elements for reimbursement of lung cancer screening. This SmartSet is designed to facilitate patients being screened for lung cancer.

Eligibility Criteria:
- Asymptomatic - no signs or symptoms of lung cancer
- Age 55 – 79 years (55 – 77 years for Medicare patients)
- Current or Former Smoker; if former, must have quit within 15 years
- 30 + pack-year smoking history
  - (# of packs per day x # of years smoking)

Progress Note / Documentation

- LUNG CANCER SCREENING SHARED DECISION MAKING VISIT

Procedure

- History of tobacco use (287.891)
- CT Chest Lung Cancer Scan Low Dose w/o
  - Gtv-1
  - Approximate: Expres-125/2016, UC, Routine, Eligibility Criteria: asymptomatic - no signs or symptoms of lung cancer, age 55-79 years (77 years for Medicare patients), current or former smoker, if former, must have quit within 15 years
  - CALL IT QUIT (QUITPLAN) RE Referral
    - Qv-1
- TOBACCO CESSATION RE Referral (GROUP VISITS, COACHING, ONLINE)
  - Qv-1
- MED THERAPY MANAGE RE Referral
  - Qv-1
