The Early Career Professionals Working Group (ECPWG) of the ATS Assembly on Critical Care (CCA) welcomes you to our ranks. The scope of the CCA includes all clinicians and scientists caring for and studying the critically ill from the bench to the bedside and beyond. CCA is formed of committees and working groups and mimics the multidisciplinary group dynamic needed to care for patients and families facing critical illness. We created this card to help you navigate the functions of the "CCA disciplines" and find areas to connect and become active in the CCA. Contact information for all chairs is located here → CCA Committees and Members.
