Supervised pulmonary rehabilitation using minimal or specialist exercise equipment in COPD: a propensity-matched analysis.

OPTImising the implementation of pulMonary rehAbiLitation in people with chronic obstructive pulmonary disease (the OPTIMAL study): mixed methods study protocol.

Environmental Awareness for Patients with COPD Undergoing Pulmonary Rehabilitation: Is It of Added Value?

Design of pulmonary rehabilitation programmes during acute exacerbations of COPD: a systematic review and network meta-analysis.

Extra-pulmonary manifestations of COPD and the role of pulmonary rehabilitation: a symptom-centered approach.
Comparison of self-report and administrative data sources to capture health care resource use in people with chronic obstructive pulmonary disease following pulmonary rehabilitation.

Does pulmonary rehabilitation decrease plasma myostatin levels in patients with COPD?
de Araujo CLP, da Silva IRV, Lago PD.

Predictors of Referral to Pulmonary Rehabilitation from UK Primary Care.
Stone PW, Hickman K, Steiner MC, Roberts CM, Quint JK, Singh SJ.
eCollection 2020.

Protocol for the cultural adaptation of pulmonary rehabilitation and subsequent testing in a randomised controlled feasibility trial for adults with chronic obstructive pulmonary disease in Sri Lanka.

Gender does not impact the short- or long-term outcomes of home-based pulmonary rehabilitation in patients with COPD.
eCollection 2020 Oct.

Inhaler technique knowledge and skills before and after an educational program in obstructive respiratory disease patients: A real-life pilot study.
The Impact of Pulmonary Rehabilitation on 24-Hour Movement Behavior in People With Chronic Obstructive Pulmonary Disease: New Insights From a Compositional Perspective.

Evaluation of a chest rehabilitation project in Nepal using the St. George's Respiratory Questionnaire and Chronic Obstructive Pulmonary Disease Assessment Test.

Virtual reality for COPD rehabilitation: a technological perspective.
Colombo V, Aliverti A, Sacco M.

EXERCISE TESTING AND TRAINING

Effect of Dynamic Hyperinflation on Cardiac Response to Exercise of Patients With Chronic Obstructive Pulmonary Disease.
Galera R, Casitas R, Martínez-Cerón E, Rodríguez-Fraga O, Utrilla C, Torres I, Cubillos-Zapata C, García-Río F.

Evaluating the Benefits of Exercise Training in HFrEF or COPD Patients: ISO-LEVEL COMPARISON CAN ADD VALUABLE INFORMATION TO Vo2peak.

The role of peripheral muscle fatigability on exercise intolerance in COPD.
Marillier M, Bernard AC, Verges S, Neder JA.
Cardiorespiratory responses to high intensity skeletal muscle metaboreflex activation in chronic obstructive pulmonary disease.
Iepsen UW, Ryrsø CK, Rugbjerg M, Secher NH, Barbosa TC, Lange P, Thaning P, Pedersen BK, Mortensen SP, Fadel PJ.

Effectiveness of physical exercise for people with chronic diseases: the EFIKRONIK study protocol for a hybrid, clinical and implementation randomized trial.

Measurement properties of step tests for exercise capacity in COPD: A systematic review.
Vilarinho R, Caneiras C, Montes AM.

Impact of exercise training and supplemental oxygen on submaximal exercise performance in patients with COPD.

One Year Change in 6-Minute Walk Test Outcomes is Associated with COPD Prognosis.

Oscillometry as a Predictor of Exercise Tolerance in COPD.

Are there differences in muscular activation to maintain balance between individuals with chronic obstructive pulmonary disease and controls?

Combined Echocardiographic and Cardiopulmonary Exercise to Assess Determinants of Exercise Limitation in Chronic Obstructive Pulmonary Disease.

BEAM study (Breathing, Education, Awareness, Movement): a randomised controlled feasibility trial of tai chi exercise in patients with COPD.

Reduced Variability of Endurance Time in New Protocols for Exercise Tests in COPD.

Non-invasive ventilation intervention during exercise training in individuals with chronic obstructive pulmonary disease: a systematic review and meta-analysis.

Evaluation of balance in patients with chronic obstructive pulmonary disease with practical tests.

Effects of low-load/high-repetition resistance training on exercise capacity, health status and limb muscle adaptation in patients with severe COPD: a randomized controlled trial.

Characteristics of effective home-based resistance training in patients with noncommunicable chronic diseases: a systematic scoping review of randomised controlled trials.

**PHYSICAL ACTIVITY**

Data Reproducibility and Effectiveness of Bronchodilators for Improving Physical Activity in COPD Patients.

Long-Term Effects of Pedometer-Based Physical Activity Coaching in Severe COPD: A Randomized Controlled Trial.

A few more steps lead to improvements in endothelial function in severe and very severe COPD.

The Gini Coefficient: A New Approach to Assess Physical Activity Inequality in COPD.

The association between systemic inflammation and the time spent in posture and movement during daytime in patients with chronic obstructive pulmonary disease and lower weight.

**TELEMEDICINE**

*Composed in collaboration with Dr. Vitalii Poberezhets (Chair of Group 01.04 - m-Health/e-health)*
A randomised controlled feasibility trial of E-health application supported care vs usual care after exacerbation of COPD: the RESCUE trial.

Diagnosing Chronic Obstructive Airway Disease on a Smartphone Using Patient-Reported Symptoms and Cough Analysis: Diagnostic Accuracy Study.

Effects of post-discharge telemonitoring on 30-day chronic obstructive pulmonary disease readmissions and mortality.
Hamadi HY, Martinez D, Xu J, Silvera GA, Mallea JM, Hamadi W, Li X, Li Y, Zhao M.

Implementing Mobile Health-Enabled Integrated Care for Complex Chronic Patients: Patients and Professionals' Acceptability Study.

Becoming more of an insider: A grounded theory study on patients' experience of a person-centred e-health intervention.
Barenfeld E, Ali L, Wallström S, Fors A, Ekman I.

Impact of Proactive Integrated Care on Chronic Obstructive Pulmonary Disease.

Using Mobile Health Technology to Deliver a Community-Based Closed-Loop Management System for Chronic Obstructive Pulmonary Disease Patients in Remote Areas of China: Development and Prospective Observational Study.
Using the Technology Acceptance Model to conceptualise experiences of the usability and acceptability of a self-management app (COPD.Pal®) for Chronic Obstructive Pulmonary Disease.

New Adopters of Telemedicine During the Coronavirus-19 Pandemic in Respondents to an Online Community Survey: The Case for Access to Remote Management Tools for Individuals with Chronic Obstructive Pulmonary Disease.

Follow-up with Telemedicine in Early Discharge for COPD Exacerbations: Randomized Clinical Trial (TELEMEDCOPD-Trial).

Perceptions of Practitioners on Telehealth and App Use for Smoking Cessation and COPD Care-An Exploratory Study.
Haluza D, Saustingl M, Halavina K.

Advanced telehealth technology improves home-based exercise therapy for people with stable chronic obstructive pulmonary disease: a systematic review.

An Automated System for Classification of Chronic Obstructive Pulmonary Disease and Pneumonia Patients Using Lung Sound Analysis.

Stage Feasibility of a Mobile Health Intervention (Copilot) to Enhance Exacerbation-Related Self-Management in Patients With Chronic Obstructive Pulmonary Disease: Multimethods Approach.
Korpershoek YJ, Holtrop T, Vervoort SC, Schoonhoven L, Schuurmans MJ, Trappenburg JC.

PATIENT REPORTED OUTCOME MEASURES

Ansari KA, Keaney N, Farooqi F.
Online ahead of print.

The relationship between body mass index and health-related quality of life in COPD: real-world evidence based on claims and survey data.
Huber MB, Kurz C, Kirsch F, Schwarzkopf L, Schramm A, Leidl R.

Relationship Between Clinical Control, Respiratory Symptoms and Quality of Life for Patients with COPD.
eCollection 2020.

Effectiveness and cost-effectiveness of the Assessment of Burden of Chronic Conditions (ABCC) tool in patients with COPD, asthma, diabetes mellitus type 2 and heart failure: protocol for a pragmatic clustered quasi-experimental study.
Boudewijns EA, Claessens D, Joore M, Keijzers LCEM, van Schayck OCP, Winkens B, Gidding-Slok AHM.
Validity of the Brazilian version of the COPD Assessment Test in patients with chronic obstructive pulmonary disease.
Flores MP, Arcuri JF, Carvalho da Silva MM, Di Lorenzo VAP.

Determination of the minimal important difference for Dyspnea-12 questionnaire in patients with COPD, after pulmonary rehabilitation.
Beaumont M, Le Garrec M, Péran L, Berriet AC, Le Ber C, Pichon R, Cabillic M.

INTERSTITIAL LUNG DISEASE

Patients with idiopathic pulmonary fibrosis with and without obstructive sleep apnea: differences in clinical characteristics, clinical outcomes, and the effect of PAP treatment.

Disease frequency, patient characteristics, comorbidity outcomes and immunosuppressive therapy in systemic sclerosis and systemic sclerosis-associated interstitial lung disease: a US cohort study.

Health-related quality of life of patients with idiopathic pulmonary fibrosis: a systematic review and meta-analysis.
Cox IA, Borchers Arriagada N, de Graaff B, Corte TJ, Glaspole I, Lartey S, Walters EH, Palmer AJ.

Pulmonary Daoyin as a traditional Chinese medicine rehabilitation programme for patients with IPF: A randomized controlled trial.
Zhou M, Zhang H, Li F, Yu Z, Yuan C, Oliver B, Li J.

Pain is a common problem in patients with ILD.
Lifestyle and clinical risk factors for incident rheumatoid arthritis-associated interstitial lung disease.

Beneficial impact of weight loss on respiratory function in interstitial lung disease patients with obesity.

Prognosis After Acute Exacerbation in Patients with Interstitial Lung Disease Other than Idiopathic Pulmonary Fibrosis.

Clinical Improvement and Effectiveness of Exercise-Based Pulmonary Rehabilitation in Patients With Idiopathic Pulmonary Fibrosis: A BRIEF ANALYTICAL REVIEW.
Vainshelboim B.

Clinical utility of a composite scoring system including Charlson Comorbidity Index score in patients with interstitial lung disease.

Idiopathic pulmonary fibrosis management: caring is sparing.
Nava S, Prediletto I.

Analysis of body mass index, weight loss and progression of idiopathic pulmonary fibrosis.

Standardization of the 6-min walk test in clinical trials of idiopathic pulmonary fibrosis.

Top 10 research priorities for people living with pulmonary fibrosis, their caregivers, healthcare professionals and researchers.

Idiopathic pulmonary fibrosis: What nurses need to know.

Impact of pharmacist-led educational interventions on asthma control and adherence: single-blind, randomised clinical trial.

Effects of continuous aerobic exercise on lung function and quality of life with asthma: a systematic review and meta-analysis.

Effect of vitamin D supplementation on asthma control in patients with vitamin D deficiency: the ACVID randomised clinical trial.
Assessment of Quality of Life in Bronchial Asthma Patients.

Opinions of patients with persistent asthma regarding the use of mobile applications for disease monitoring.

What do asthmatic patients think about telemedicine visits?

Non-response did not affect prevalence estimates of asthma and respiratory symptoms - results from a postal questionnaire survey of the general population.

Clinical and biological factors associated with irreversible airway obstruction in adult asthma.

Overweight improves long-term survival in Japanese patients with asthma.

Group-randomized trial of tailored brief shared decision-making to improve asthma control in urban black adults.

Cognition, Symptom Perception, and Medication Non-adherence in Older Adults with Asthma.

Evolving Strategies for Long-term Asthma Management.

A call to action for improving clinical outcomes in patients with asthma.

Risk of re-hospitalization and death in patients hospitalized due to asthma.

Knowledge and Current Practices of Nigerian Physiotherapists on the Physical Activity and Exercise Training in the Rehabilitation of Patients with Asthma.

The Danish severe asthma register: an electronic platform for severe asthma management and research.
Trends in Advance Care Planning for Patients with COPD in an Integrated Health Care System.
Griffith MF, Levy CR, Lum HD, Teno JM, Dale CR.

Improving the quality of community primary palliative care in COPD: A qualitative study of health-care providers.
Hirakawa Y, Hirahara S, Yamaguchi Y, Yamanaka T, Arai H, Miura H.

Effectiveness of an End-of-Life Nursing Education Consortium Training on Registered Nurses' Educational Needs in Providing Palliative and End-of-Life Patient Care.
Manning J, Creel A, Jones N.

Hospitalisations at the end-of-life among chronic obstructive pulmonary disease and lung cancer patients: a nationwide study.
Costa AR, Lunet N, Martins-Branco D, Gomes B, Lopes S.

The Role of Palliative Care in COPD.
Baltaji S, Cheronis N, Bajwa O, Cheema T.

Palliative Care Referral in the Chronic Obstructive Pulmonary Disease Population.

Quality of dying and death in patients with interstitial lung disease compared with lung cancer: an observational study.
Effectiveness and implementation of palliative care interventions for patients with chronic obstructive pulmonary disease: A systematic review.
Broese JMC, de Heij AH, Janssen DJA, Skora JA, Kerstjens HAM, Chavannes NH, Engels Y, van der Kleij RMJJ.

Hospitalised patients with palliative care needs: Spain and Sweden compared.

**COMORBID CONDITIONS**

Multimorbidity networks of chronic obstructive pulmonary disease and heart failure in men and women: evidence from real world data.

Influence of Comorbidities on the Survival of COPD Patients According to Phenotypes.

Sarcopenia in patients with chronic obstructive pulmonary disease: A study of prevalence and associated factors in Western Greek population.
Tsekoura M, Tsepis E, Billis E, Gliatis J.
COPD is Associated with Higher Prevalence of Back Pain: Results of a Population-Based Case-Control Study, 2017.

Chronic Obstructive Pulmonary Disease and Incidence of Hip Fracture: A Nested Case-Control Study in the EpiChron Cohort.

Cardiovascular risk management in COPD patients: impact of the new Dutch guideline.
Nies LME, I L, Rozendaal R, Baar B, Vos RC, Hart HE.

Management of patients with chronic obstructive lung disease, Type 2 diabetes and both diseases in primary care in Denmark.
Lange P, Petersen PW, Gerdes B, Tarnow L.

Comorbidities Associated With Chronic Obstructive Pulmonary Disease.
Villgran V, Gordon A, Malik K, Cheema T.

COPD and Cardiovascular Disease: A Review of Association, Interrelationship, and Basic Principles for Integrated Management.
Shnoda M, Gajjar K, Ivanova V.

Obesity and the Lung: What We Know Today.
Brock JM, Billeter A, Müller-Stich BP, Herth F.

Relapse of chronic obstructive pulmonary disease and myocardial infarction: what is the connection?
Terrosu P.
EXACERBATIONS / HOSPITALISATIONS / MORTALITY

**Role of acute exacerbations in skeletal muscle impairment in COPD patients.**
Gosker HR, Langen RC, Simons SO.

**Management and Risk of Mortality in Patients Hospitalised Due to a First Severe COPD Exacerbation.**
Janson C, Nwaru BI, Wiklund F, Telg G, Ekström M.
Information Needs in COPD After an Educational Programme: Influence in Exacerbations and Admissions.

Study of potentially preventable hospitalisations (PPH) for chronic conditions: what proportion are preventable and what factors are associated with preventable PPH?

Risk factors and associated outcomes of hospital readmission in COPD: A systematic review.

Once Daily Versus Overnight and Symptom Versus Physiological Monitoring to Detect Exacerbations of Chronic Obstructive Pulmonary Disease: Pilot Randomized Controlled Trial.

Acute Exacerbation of Chronic Obstructive Pulmonary Disease.

Mortality prediction in chronic obstructive pulmonary disease comparing the GOLD 2015 and GOLD 2019 staging: a pooled analysis of individual patient data.
Interventions to standardise hospital care at presentation, admission or discharge or to reduce unnecessary admissions or readmissions for patients with acute exacerbation of chronic obstructive pulmonary disease: a scoping review.

Unreported and Overlooked: A Post Hoc Analysis of COPD Symptom-Related Attacks from the RISE Study.

COPD exacerbation rates are higher in non-smoker patients in India.

The Impact of Depression and Anxiety on Chronic Obstructive Pulmonary Disease Acute Exacerbations: A prospective cohort study.

A Trend Analysis of COPD Mortality in the United States by Race and Sex.

Caring for patients at home after acute exacerbation of Chronic Obstructive Pulmonary Disease: A phenomenological study of family caregivers' experiences.

Occupational exposures and exacerbations of asthma and COPD-A general population study.
Modified and simplified clinically important deterioration: multidimensional indices of short-term disease trajectory to predict future exacerbations in patients with chronic obstructive pulmonary disease.

Blood Eosinophils and Clinical Outcome of Acute Exacerbations of Chronic Obstructive Pulmonary Disease: A Systematic Review and Meta-Analysis.
You Y, Chao Shi G.

COVID-19
*Composed in collaboration with Dr. Vitalii Poberezhets (Chair of Group 01.04 - m-Health/e-health)

The relationship between severe or dead COVID-19 and asthma: a meta-analysis.
Wang Y, Ao G, Qi X, Ma M.

COVID-19 and Interstitial Lung Disease: Keep Them Separate.
Podolanczuk AJ, Richeldi L.

COVID-19 and COPD: a narrative review of the basic science and clinical outcomes.
Higham A, Mathioudakis A, Vestbo J, Singh D.
COPD assessment test for the evaluation of COVID-19 symptoms. 

Why asthma might surprisingly protect against poor outcomes in COVID-19. 

The Impact of COVID-19 on Patients with Asthma. 

Impact of COVID-19 on patients with asthma. 

Reduced risk of COVID-19 hospitalization in asthmatic and COPD patients: a benefit of inhaled corticosteroids? 

Clinical characteristics of COVID-19 patients with asthma in Wuhan, China: a retrospective cohort study. 

Prognostic factors for severity and mortality in patients infected with COVID-19: A systematic review. 
Clinical, regional, and genetic characteristics of Covid-19 patients from UK Biobank.
Kolin DA, Kulm S, Christos PJ, Elemento O.

Moving singing for lung health online in response to COVID-19: experience from a randomised controlled trial.

Face masks, respiratory patients and COVID-19.
https://pubmed.ncbi.nlm.nih.gov/32994197/

Risk Factors for Mortality Following COVID-19 in Patients with Pre-existing Interstitial Lung Disease.

Clinical outcomes and characteristics of patients hospitalized for Influenza or COVID-19 in Germany.
Ludwig M, Jacob J, Basedow F, Andersohn F, Walker J.

Clinical and epidemiological profile of patients infected by COVID-19 at a tertiary care centre in North India.
Prakash S, Agrawal MM, Kumar R, Yadav S.

Impact of comorbid asthma on severity of coronavirus disease (COVID-19).
Lee SC, Son KJ, Han CH, Jung JY, Park SC.

Caring for patients with COPD and COVID-19: a viewpoint to spark discussion.
Simons SO, Hurst JR, Miravitlles M, Franssen FME, Janssen DJA, Papi A, Duiverman ML, Kerstjens HAM.

Generic and Respiratory-Specific Quality of Life in Non-Hospitalized Patients with COVID-19.

Clinical characteristics and risk factors for mortality of patients with COVID-19 in a large data set from Mexico.
Parra-Bracamonte GM, Lopez-Villalobos N, Parra-Bracamonte FE.

The Medium-Term Impact of COVID-19 Lockdown on Referrals to Secondary Care Mental Health Services: A Controlled Interrupted Time Series Study.

Clinical features and risk factors for severe inpatients with COVID-19: A retrospective study in China.

Smoking and comorbidities are associated with COVID-19 severity and mortality in 565 patients treated in Turkey: a retrospective observational study.
Caliskan T, Saylan B.

Pre-existing COPD is associated with an increased risk of mortality and severity in COVID-19: a rapid systematic review and meta-analysis.

Risk factors associated with 28-day all-cause mortality in older severe COVID-19 patients in Wuhan, China: a retrospective observational study.
