Milestones 2.0: An Update

Laura Edgar, EdD, CAE
Vice President, Milestones Development

Timeline for Milestones 2.0

- Recruitment for development groups will begin this fall/winter
- Meetings are expected to be held in person
- Most drafts will be available for Public Comment in fall of 2022
- Implementation for most: July 1, 2023

Milestones 1.0

Milestones 2.0

Supplemental Guide
Supplemental Guide

Created to assist programs with Milestone’s assessment and the creation of a shared mental model within the Clinical Competency Committee.

Used as a companion tool to the Milestones to provide more in-depth information and explanation.

Supplemental Guide

Pediatric Subspecialties

All subspecialties will use the same subcompetencies for SBP, PBLI, PROF, and ICS.

Each specialty will have the option to add others as needed (e.g., Difficult Conversations, Informatics).
Pediatric Subspecialties - OPTIONS

PC and MK will be determined by the individual subspecialty – in many cases EPAs are similar to Milestones

May choose to use the same (or some) as core Pediatrics and only create the Supplemental Guide

May choose to create their own subcompetencies and a Supplemental Guide

From Your Colleagues

Subspecialty (and Sub-Subspecialty) - specific Milestones has worked well for IM and other primary care specialties

Allows for expanded assessment tool opportunities and common understanding between CCCs

Pediatric Emergency Medicine

EPA4: Provide patient triage, resuscitation, and stabilization; align care provided with severity of illness

Pediatric Emergency Medicine

EPA4: Provide patient triage, resuscitation, and stabilization; align care provided with severity of illness
Geriatrics: For IM – this did not fit into shared Milestone

The specific functions which define this EPA include:

4. Performing technical skills pertinent to the procedure
5. Managing post-procedure complications
6. Interpreting results of the procedure in the context of the patient

EPA5 for Pulmonology vs PC4 from Pulmonary Disease

EPA5: Demonstrate competence in performing the common procedures of the pediatric pulmonary subspecialist

The specific functions which define this EPA include:

4. Performing technical skills pertinent to the procedure
5. Managing post-procedure complications
6. Interpreting results of the procedure in the context of the patient
