2022 Road Map for Medical Educators

Welcome

conference.thoracic.org

Welcome Letter

Welcome to the 2022 American Thoracic Society International Conference in San Francisco, CA.

Much has changed in our world and our lives since the last in-person ATS conference. We are excited to see friends and colleagues in person, but also uncomfortable at the thought of being around so many people. I expect that many of you will share these mixed feelings. As always, I know that we will support each other. I am hopeful that we will all find aspects of this meeting that will rejuvenate, spark curiosity and grow connections.

The Section on Medical Education has created this Roadmap for Educators to highlight events of particular interest for those of us who consider teaching, curriculum development, educational program leadership and educational research as major elements of our careers. We encourage you to attend these events, along with the many other sessions focused on the latest developments within your scientific or clinical areas of interest. Be sure to stop by the Center for Career Development, a space to relax and network with like-minded clinicians, where you can also find programming devoted to the interests of educators.

Recognizing the rapid growth of interest in medical education as a career pathway, the ATS established the Section on Medical Education in 2015. The Section has over 3000 members and is a great way to network and collaborate with a community of professionals who share similar aspirations and are navigating many of the same challenges often faced for educators. If you want to get more involved with the Section, come to our membership meeting on **Monday, May 16 at 1:15 pm at the Marriott Marquis Hotel, Room: Yerba Buena Ballroom, Salon 11-13, Floor: Lower B2 Level, to meet others with the same idea and join our virtual programming meeting on Monday May 23 at 4pm EDT.**

In addition to the programming at the International Conference, the Section on Medical Education offers webinars throughout the year, and supports a mentorship program, awards program, and many other career development opportunities. Contact one of us if you have ideas for a webinar, symposium, or other programming or projects related to training and education. Beyond this annual meeting, the ATS Section of Medical Education is your professional home for a career in medical, nursing, or science education.

Regardless of whether you get involved with the Section on Medical Education or with an ATS Assembly in your area of clinical interest, the important message is to get involved! The ATS is a forum through which you can connect to leaders in our field from around the world, enriching both your personal and professional satisfaction long after you have returned home from this annual meeting. Again, welcome to ATS 2022 and we look forward to seeing you there!

Rosemary Adamson, MB BS, ATSF
Chair, Section on Medical Education
adamsonr@uw.edu

Stacey Kassutto, MD
Chair, Programming, Section on Medical Education

Diana Kelm, MD
Co-Chair, Programming, Section on Medical Education

Center for Career Development

Sunday, May 15 –Tuesday, May 17
7 a.m. – 5 p.m. PT
Moscone Convention Center
Room 153
(South, Upper Mezzanine)

The Center for Career Development is a professional networking and career development forum for early career professionals (medical students, residents, fellows, post docs, other allied healthcare and research professionals) in training or transitioning from training in Pulmonary, Critical Care or Sleep Medicine. Each day, the CCD features informal workshops aimed at enhancing the professional development for all health care professionals. The sessions in the CCD are a unique and valuable opportunity for YOU to interact with experts in PCCM and have your questions answered about career development topics that are important to you!

All times listed are Pacific Time.
